OUR HIGH-CAPACITY ICE MAKER

Our advanced ice maker is designed to meet the demands of businesses requiring reliable and consistent ice production. Featuring a high-performance system, this machine delivers an impressive 350kg of ice per day and offers a range of features to ensure efficiency and convenience for your operations.The machine's automatic water inlet and air-cooling system simplify maintenance and optimize performance, while its robust construction ensures durability. With a compact footprint and smart design, this ice maker is ideal for restaurants, cafes, and catering services.The unit produces 156 perfectly sized cubes (23x23x23mm) per cycle in just 12-20 minutes, providing a steady supply of ice even during peak hours. Its large storage capacity of 125kg ensures you always have ice ready when you need it. Operating at 750W and compatible with 220V/50Hz this ice maker is energy-efficient and easy to integrate into any setting. It also uses the R404 refrigerant, ensuring reliable cooling while maintaining environmental responsibility.
