AISBOX-XL-750

OUR HIGH-CAPACITY ICE MAKER

Our advanced ice maker is designed to meet the demands of businesses requiring reliable and consistent ice production. Featuring a high-performance system, this machine delivers an impressive 750kg of ice per day and offers a range of features to ensure efficiency and convenience for your operations. The machine's automatic water inlet and air-cooling system simplify maintenance and optimize performance, while its robust construction ensures durability. With a compact footprint and smart design, this ice maker is ideal for restaurants, cafes, and catering services. The unit produces 684 perfectly sized cubes (23x23x23mm) per cycle in just 15-25 minutes, providing a steady supply of ice even during peak hours. Its large storage capacity of 500kg ensures you always have ice ready when you need it. Operating at 2200W and compatible with 220V/50Hz, this ice maker is energy-efficient and easy to integrate into any setting. It also uses the R404a refrigerant, ensuring reliable cooling while maintaining environmental responsibility.

TECHNICAL DATA AND SPECIFICATION

- Production Capacity: Up to 750kg of ice per 24 hours (up to 75 bags)
- Ice Produce: Up to 75 Bags Of ice
- Storage capacity : Up to 500 kg
- Ice Cube Output: Each cycle produces 684 ice cubes.
- Cycle Time: Between 10 to 15 minutes
- Water Supply: It features an automatic water inlet
- Inlet Power: Operating at a power of 2200W (16A) Solo DB 20A
- Voltage Options: It is available in both 220V/50Hz
- Gas Refrigerant: Using R404,
- Cooling System: It utilizes air cooling
- Total Machine Weight: 321 KG
- Dimensions: while the Packing size 1320*890*1022mm, (203kg) 1300*1010*1245mm (121kg)
- Water filtering : UF Membrane system stainless steel
