OUR HIGH-CAPACITY ICE MAKER

Our advanced ice maker is designed to meet the demands of businesses requiring reliable and consistent ice production. Featuring a high-performance system, this machine delivers an impressive 500kg of ice per day and offers a range of features to ensure efficiency and convenience for your operations. The machine's automatic water inlet and air-cooling system simplify maintenance and optimize performance, while its robust construction ensures durability. With a compact footprint and smart design, this ice maker is ideal for restaurants, cafes, and catering services. The unit produces 440 perfectly sized cubes (23x23x23mm) per cycle in just 10-15 minutes, providing a steady supply of ice even during peak hours. Its large storage capacity of 170kg ensures you always have ice ready when you need it. Operating at 2200W and compatible with 220V/50Hz this ice maker is energy-efficient and easy to integrate into any setting. It also uses the R404 refrigerant, ensuring reliable cooling while maintaining environmental responsibility.

TECHNICAL DATA AND SPECIFICATION

- Production Capacity: Up to 500kg of ice per 24 hours (up to 50 Bag Ais)
- Ice Storage: Up to 170kg of ice
- Ice Cube Output: Each cycle produces 440 ice cubes,
- Voltage Options: It is available 220V/50Hz voltage configurations
- Water Supply: It features an automatic water inlet
- Cycle Time: Between 10 to 15 minutes
- Inlet Power: Operating at a power of 2200W
- Refrigerant: Using R404
- Cooling System: It utilizes air cooling
- Weight: The Net Weight of the unit is 155.5kg
- Dimensions: The Product Size is 760*840*1960mm,
- Dimensions: while the Packing Size 880*805*1092mm 159kg, 840*910*1145mm 77kg
- UF Membrane water filtering system stainless steel
